CONTENTS

EDITORS' NOTES 1
Renée E. Weiss, Dave S. Knowlton, Bruce W. Speck

1. A Theoretical Framework for the Online Classroom: A Defense and Delineation of a Student-Centered Pedagogy 5
Dave S. Knowlton
For online learning to be effective, a student-centered pedagogy, which requires a shift in the role of the professor, must be adapted. Professors are no longer umpires and judges; instead, they are coaches and counselors.

2. Designing Instruction for Learning in Electronic Classrooms 15
Gary R. Morrison, Peter F. Guenther
The World Wide Web offers unique teaching and learning opportunities. To take advantage of these opportunities, professors and designers need to understand not only how the Web can support learning but also how to design courses to make the most of Web capabilities.

3. Components of the Online Classroom 23
Zane L. Berge
Once professors determine the purpose of online communication, they will want to determine which online tools are appropriate for their course.

4. Making Decisions: The Use of Electronic Technology in Online Classrooms 29
Michael Simonson
Professors can consult guidelines to help them choose which electronic technologies to use to promote effective teaching in the online classroom.

5. Students as Seekers in Online Courses 35
Mark Canada
Although students have the responsibility for learning in the online classroom, professors need to be aware of behavioral changes students can make to be successful.

6. Accommodating Students with Special Needs in the Online Classroom 41
Thomas J. Buggey
Certain federal laws were enacted to ensure equal access to educational opportunities. Professors can design an accessible online course to fulfill the intent of the laws.

7. Humanizing the Online Classroom 47
Renée E. Weiss
Professors can make the online course more personable and create a sense of community among students.

8. Promoting Deep and Durable Learning in the Online Classroom 53
Douglas J. Hacker, Dale S. Niederhauser
Five principles of instruction have been shown by current research to promote deep and durable learning. Specific examples show how these principles apply to online courses.

9. Evaluating Students' Written Performance in the Online Classroom 65
John F. Bauer, Rebecca S. Anderson
Professors can evaluate students' written performance in the online classroom by using rubrics to assess content, expression, and participation. The e-folio provides professors with a summative assessment in the online course.

10. The Academy, Online Classes, and the Breach in Ethics 73
Bruce W. Speck
The academy has embarked on the commercialization of online courses without giving sufficient attention to conducting adequate research about online courses, training professors to operate successfully in online courses, and preserving academic integrity.

11. Epilogue: A Cautionary Note About Online Classrooms 83
R. W. Carstens, Victor L. Worsfold
Online courses may be radically redefining education at the expense of actual learning.
