CONTENTS

EDITORS' NOTES 1
Rebecca S. Anderson, John F. Bauer, Bruce W. Speck

1. Learning-Teaching-Assessment Paradigms and the On-Line Classroom 5
Bruce W. Speck
Professors need to engage in rigorous design and assessment of on-line learning just as they would in face-to-face and printed materials, grounding their decisions in solid pedagogical theory and practice.

2. What Professors Need to Know About Technology to Assess On-Line Student Learning 19
Marshall G. Jones, Stephen W. Harmon
There is much movement in the direction of on-line learning, but it is important to consider the nature of on-line courses and the extent to which that nature determines what is done by instructors and students.

3. Assessing Student Work from Chatrooms and Bulletin Boards 31
John F. Bauer
An advantage of on-line learning is that it can provide a permanent record of student participation in discussions. The question addressed in this chapter is how to assess that participation fairly and objectively.

4. Assessing Students' Written Projects 37
Robert Gray
Because so much of student work on-line is done in written format, it is important for instructors to know how to evaluate writing and how to take advantage of the technology to do it.

5. Group Assessment in the On-Line Learning Environment 43
John A. Nicolay
Just as group work is becoming more and more prevalent in college classrooms, it is also a growing part of on-line learning. This chapter provides five principles for assessing group work on-line.

6. Assessing Field Experiences 53
Jane B. Puckett, Rebecca S. Anderson
In professional preparation programs that feature a great deal of field-work, can on-line formats be used to monitor and assess student work?

7. Enhancing On-Line Learning for Individuals with Disabilities 61
James M. Brown
One of the advantages of on-line instruction is that it provides access for students who would not normally be able to participate in many course activities. This chapter provides guidelines on how to take advantage of this feature.

8. Assessing E-Folios in the On-Line Class 69
Mark Canada
On-line instruction provides an excellent opportunity for students to create and publish on-line portfolios of their work. This method of assessment is just beginning to make inroads into the on-line environment.

9. Preparing Students for Assessment in the On-Line Class 77
Michele L. Ford
Just as instructors are adapting to new technologies, students must adjust their thinking about teaching and learning. This chapter provides suggestions about how to help students make the transition to on-line assessment.

10. Assessing the On-Line Degree Program 83
Joe Law, Lory Hawkes, Christina Murphy
As more programs are offered on-line, it is important that institutions maintain the quality of those offerings. This chapter describes guidelines for assessing the integrity and quality of such degrees.

11. Assessing the Usability of On-Line Instructional Materials 91
Brad Mehlenbacher
In addition to the quality of the content and instructional method, a number of other considerations are useful in assessing whether on-line materials will be effective. This chapter covers a wide range of criteria for instructor use in this task.

12. Epilogue: A Cautionary Note About On-Line Assessment 99
Richard Thomas Bothel
Not all instructors are enthusiastic about the movement toward on-line learning. This chapter raises some concerns that should be addressed now.
