

# Pédagogie collégiale

Ideas, research and pedagogical practices in higher education

## Summary

Spring-Summer 2024 | vol. 37, n° 3

*Pédagogie collégiale* is a triannual journal whose mission is to guide interventions in college education by presenting rich and varied information, to fuel pedagogical reflection and exchange, and to promote innovative teaching practices. The journal presents articles written by individuals in the field of higher education, especially at the college level.

## Cover

**Alexanne Julien**, a student at Collège Ahuntsic, excelled in a creative challenge for first-year Graphic Design students organized by the Association québécoise de pédagogie collégiale (AQPC) and the college's Graphic Design department. Her work was chosen for the cover among many others produced as part of the course *Langage graphique : communication*. This year, the mandate was to create a front cover using the counterform technique, in line with the theme of the annual thematic issue *When Everything Transforms*.
